

DUET® FOR MICROSOFT TEAMS, BY BANDWIDTH

Direct Routing with Dynamic E911

Moving to Microsoft Teams?

If you've chosen Direct Routing to power voice calling for Microsoft Teams, you also need to figure out E911 and texting.

Moving to Microsoft Teams requires a migration plan that includes your calling strategy, dynamic E911 capabilities, and business messaging to help you meet complex regulations and communications needs.

Bandwidth is the only carrier that offers a comprehensive SIP and E911 solution for the enterprise.

With Bandwidth's Duet® for Microsoft Teams, you can bundle reliable, scalable, and cost effective voice and E911 for a seamless migration experience and maximum control over your telephony—all from a trusted, long-time Microsoft solution provider.

With our award-winning Duet for Microsoft Teams, you'll receive:

- One trusted vendor for SIP, E911 and SMS/MMS
- Secure, redundant, reliable voice, messaging and 911 coverage for U.S. and Canada
- Dynamic location routing capabilities to help achieve compliance with E911 laws like RAY BAUM's Act
- Better Direct Routing with greater telephony control
- Software-driven SIP for automated porting, provisioning, and rollbacks
- Greater ROI by lowering on-prem equipment costs and pooling usage across users
- Stellar service from the Bandwidth team (with a 9.8 customer satisfaction rating)

Simplify your communications and accelerate your move to the cloud
